Compact Personal Recording Studio

A portable computer-based music production system featuring Mbox Mini hardware and Pro Tools LE® software

Professionals around the world have long been using Pro Tools® recording systems to create award-winning music and sound for film and TV. Now you can get the same professional results in your personal studio with Pro Tools Mbox® Mini—a complete, integrated, computer-based music creation and production system. The ultra-portable Pro Tools Mbox Mini features everything you need to easily compose, record, edit, and mix music—including studio-standard Pro Tools LE® software. You get over 70 stunning effects and virtual instruments, plus other tools and features to help you create music quickly and easily. Mbox Mini also delivers premium sound quality, plus rock-solid compatibility with nearly every popular audio recording application.

Premium quality

Designed by the same engineering team behind our top-of-the-line Pro Tools|HD systems, the Mbox Mini interface features advanced recording technology for exceptional quality. A premium analog signal path and high-performance converters deliver pristine 24-bit, 48kHz sound. Stringent testing standards ensure rock-solid performance in the most demanding environments. And of course, Mbox Mini is designed for ultra-tight integration with the included Pro Tools LE® software, which is based on the same platform trusted by professional musicians, engineers, and producers around the world.

Unsurpassed flexibility

The Mbox Mini interface also works with other major recording applications, so you can make music any way you want. All-new drivers provide superior performance with Logic, Live, Record, Reason, Fruity Loops, Cubase, Nuendo, Sonar, and more. So go ahead, use your favorite third-party DAW from start to finish—or record with the included Pro Tools LE software to ensure your sessions are compatible with pro studios around the world. No matter how you work, you'll sound great with Mbox Mini.
